

In-the-Ear (ITE) & Behind-the-Ear (BTE)

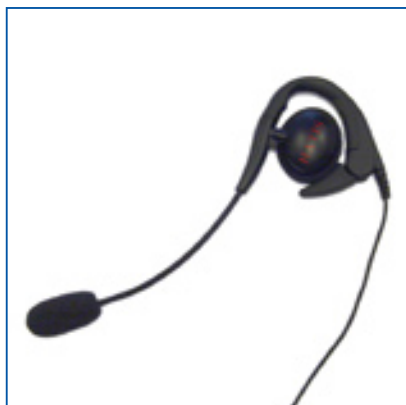

Hearing Aid Compatible* Headsets

Whether you want to make or take telephone calls, listen to radio or music either at home or on the go, there is a Hatis® headset suitable for you.

PRODUCER 2.5mm plug

ITE

A producer that works for in-the-ear hearing-aid compatibility. Plus 2-way ear flexibility and volume control.

- Specially engineered to meet the comfort and clarity needs of the ITE hearing aid user.
- No acoustical feedback.
- Patented T-Coil coupling for premium telecommunications clarity.
- The Producer can be tailored via volume control to the user's degree of hearing loss.
- Hands-free operation improves productivity.
- 77% lighter than competitive boom mikes.
- Swiveling earpiece accomodates either ear.
- No more need to adjust hearing aid volume.
- Battery-free.
- Audiologist tested and approved.
- Provides interference-free clarity.
- Works with cordless and mobile phones with standard 2.5 mm plug.

DIRECTOR 2.5mm plug

business

A professional level headset for either in or behind-the-ear hearing-aids.

- The ultimate business solution for working professionals with BTEs and ITEs.
- First-of-it's-kind, Director rests on the user's cheek, not the hearing aid, for greater comfort.
- Hands-free design and unequalled clarity allows for increased productivity.
- Powerful boom microphone ensures you can be heard clearly.
- Unlike silhouettes, the HATIS® earpiece has a solid cable connection, which means no more loose connections and greater sound quality.
- Eliminates buzzing, distortion, and feedback.
- Make phone calls hands-free from feather-light headset.
- Compatible with virtually all mobile and cordless telephones as well as digital hearing aids with T-coils.
- Powerful boom microphone.
- Earpiece is left or right ear compatible for maximum flexibility.
- Patented induction coupler.
- No batteries or fitting required.

*note: all HATIS® products are designed to work specifically with t-coil equipped hearing aids

Compatible cell phone 'throat-mic' headsets for either in or behind-the-ear hearing aids with T-coils.

- Patented HATIS technology delivers optimum clarity without the hassle of batteries.
- Use with compatible digital mobile and cordless phones.
- Advanced in-line microphone.
- Make and receive calls hands-free.
- Unlike silhouettes, the HATIS® earpiece has a solid cable connection, which means no more loose connections with enhanced sound quality.
- Eliminates buzzing, distortion, and feedback.
- Compatible with virtually all cellular, cordless telephones, which have standard 2.5mm headset jacks.
- Powerful in-line microphone.
- Feather-light headset.
- Patented induction coupler.
- Slips discreetly behind the ear.
- No batteries or fitting required.

No compromise for music lovers! Behind-the-ear hearing-aid compatible with neurologically 'stereophonic effects'.

- Engineered to deliver unsurpassed clarity with electronic audio devices.
- Compatible with your Walkman™, television, CD/MP3 player, computer, stereo receiver, and many other audio devices.
- Customers agree - using the Epic is music to the ears.
- Use with compatible receivers at theatres, cinemas, and on tours.
- Unlike silhouettes, the HATIS® earpiece has a solid cable connection, which means no more loose connections and greater sound quality.
- Listen to your favorite music or TV show.
- Eliminates buzzing, distortion, and feedback.
- Gold leads for clean, pure sound transmission.
- Feather-light, dual headset.
- Patented induction coupler.
- No batteries required.
