

Superprint 4425L* with Large Visual Display

The Large Visual Display is for TTY users who are visually impaired. This bright display magnifies the characters in every TTY conversation, making each word large, clear and easy to read.

Characters magnified on the Large Visual Display appear much larger than characters on a standard TTY display. A variety of lens colours is available to enhance readability.

The Large Visual Display connects to an external port on the SUPERPRINT 4425L*. The port must be ordered when purchasing the TTY.

You can use the built-in printer on the SUPERPRINT 4425L* at the same time you are using the Large Visual Display. This lets you adjust the print style to bold or wide giving you a record of the conversation when you are finished.

FEATURES

- Connects to a SUPERPRINT 4425L* with an external port.
- Large display shows character in bold type.
- Your conversation is shown on both the TTY display and on the Large Visual Display.
- A variety of lens colours are available: blue-green (standard), amber, blue, rose (indicate colour when ordering).
- One-year limited warranty.

OPTIONS

- Large Visual Display colour lens.
