

# Uniphone 1150\*

## Combination TTY, telephone & amplified phone all in one!

The UNIPHONE is an exciting new concept in TTYs, combining a telephone, TTY and amplified telephone - all in one! Now, people who are deaf, hard of hearing or hearing can all share one telephone. It is the telephone your whole family will enjoy. A full-featured TTY, the UNIPHONE includes a bright 2-line display and a comfortable keyboard to make TTY conversations easy. Its attractive, modern design complements any room or office. It is perfect for making Voice Carry Over (VCO) calls. With VCO, you speak directly to the other person and read their typed responses on the display. VCO calls can be made through a relay service, or directly between UNIPHONE users. In a similar way, people who cannot speak can make Hearing Carry Over (HCO) calls. Turn up the volume on the amplified handset to the most comfortable setting.

The UNIPHONE 1150 answers calls with the programmed greeting and takes TTY messages when you are unavailable. The 8K memory lets you save and review auto-answer messages and conversations.
