

Univox* Listener

Loop Tester & Personal Communicator

With UniVox Listener you can accomplish a fast and simple control check of the sound quality and magnetic field strength of an induction loop system. UniVox Listener has been developed towards the caretaker or building technician and enables him to control the proper function of the loop system before usage of the system.

UniVox Listener is also a neat loop receiver which makes it possible for hearing impaired without a hearing aid to take advantage of the sound broadcasted in the installed loop system.

UniVox Listener is comfortably worn around the neck in an easy-to-open textile neck cord. All controls are easily accessible with a one hand grip.

UniVox Listener can also be used as a basic communication amplifier.
