

Sennheiser, an experienced producer of infra-red and radio wave listening devices with a reputation for quality, reliability and service. The Sennheiser range includes systems to suit users with or without hearing aids with T switches.

Their products are easy to operate, comfortable to wear and economical to run as they are powered by rechargeable batteries that are charged by the transmitter. A single transmitter can be used with multiple receivers.

Sennheiser* Set 810S Mono/Stereo

Infra-Red System

Enjoy better hearing with the Sennheiser neck loop, which uses infra-red technology to deliver high-level quality sound from the TV or radio to your hearing aid with a "T" switch. The individually adjustable volume control allows you to watch TV with your family without any disturbance. The neck loop and receiver is light weight and easy to use.

FEATURES

- Delivers sound from mono or stereo TV directly to your ears.
- Great for TV, radio or stereo listening.
- Individually adjustable volume control.
- Cordless, lightweight and portable.
- Economically powered by rechargeable batteries.
- Easy to use in a neckloop version (for hearing aid wearers with a T switch).
- Range of up to 12m.
