

Sennheiser, an experienced producer of infra-red and radio wave listening devices with a reputation for quality, reliability and service. The Sennheiser range includes systems to suit users with or without hearing aids with T switches.

Sennheiser* Set 820 Mono/Stereo

Radio Frequency System

Turn up the volume when watching TV without disturbing others. Connect the transmitter to the audio output jack on your TV, then adjust the volume on the headset.

Their products are easy to operate, comfortable to wear and economical to run as they are powered by rechargeable batteries that are charged by the transmitter. A single transmitter can be used with multiple receivers.

FEATURES

- Delivers sound from mono or stereo TV directly to your ears.
- Great for TV, radio or stereo listening.
- Individually adjustable volume control.
- Cordless, lightweight and portable.
- Economically powered by rechargeable batteries.
- Easy to use in a stetoclip version.
- Allows freedom of movement within a range of up to 30m.
- Compatible with the latest plasma panel TV.
