

Sennheiser, an experienced producer of infra-red and radio wave listening devices with a reputation for quality, reliability and service. The Sennheiser range includes systems to suit users with or without hearing aids with T switches.

## Sennheiser\* Set 820S Mono/Stereo

### Radio Frequency System

Enjoy better hearing with the Sennheiser neck loop, which uses radio frequency technology to deliver high-level quality sound from the TV or radio to your hearing aid with a "T" switch. The individually adjustable volume control allows you to watch TV with your family without any disturbance. The neck loop and receiver is light weight and easy to use.

Their products are easy to operate, comfortable to wear and economical to run as they are powered by rechargeable batteries that are charged by the transmitter. A single transmitter can be used with multiple receivers.

### FEATURES

- Delivers sound from mono or stereo TV directly to your ears.
- Great for TV, radio or stereo listening.
- Individually adjustable volume control.
- Cordless, lightweight and portable.
- Economically powered by rechargeable batteries.
- Easy to use in a neckloop version (for hearing aid wearers with a T switch).
- Allows freedom of movement within a range of up to 30m.
- Compatible with the latest plasma panel TV.
